ABSTRACT

A study was conducted at Mercer County Community College (MCCC) to analyze student enrollment according to patterns of graduation, readmittance, and persistence. The years 1978 through 1983 were studied, and comparisons were made for both full- and part-time entrants over 6 consecutive semesters. Non-return rates and changes in program type after 1 semester were examined for 3 consecutive years (i.e., 1980-81, 1981-82, and 1982-83). Study findings included the following: (1) the 1-semester return rate for entering full-time students rose from 78% in fall 1978 to 83% in fall 1982; (2) spring entrants were less likely to return for the fall semester, with return rates ranging from 54% to 57%; (3) the percentage of students who switched from part-time to full-time status increased from 10% in fall 1978 to 15% in fall 1982; (4) the overall full-time student non-return rate declined from 21% among fall 1980 entrants to 17% for the fall 1982 entering cohort; (5) part-time student persistence remained relatively stable across all semesters in spite of a steady increase in part-time enrollment; (6) graduation rates were highest among full-time fall entrants after 4 semesters of attendance; (7) in general, graduation rates were higher for fall than for spring entrants even after 6 semesters of attendance; and (8) the largest decline in non-return rates for full-time students occurred in MCCC's certificate program. Student Enrollment Patterns[1]

1978 - 1983

I. EXECUTIVE SUMMARY

The student enrollment pattern report presents findings according to designated patterns of graduation, readmittance, and persistence. The years 1978 through 1983 were studied and comparisons were made for both full-time and part-time entrants over six consecutive semesters. Non-return rates and program changes after one semester were examined for three consecutive years (1980-81, 1981-82 and 1982-83).

It was found that the one semester return rate for Fall semester full-timers who returned either full-time or part-time in the spring has steadily increased over the five years examined. In Fall 1978, only 78% of the entering cohort returned, while in Fall 1982, 83% returned. The percentage of students switching from full-time to part-time status has increased 5% (from 10% in Fall 1978 to 15% in Fall 1982). Conversely, the percentage of students who switched from part-time to full-time status has also increased slightly (from 3% in Fall 1978 to 5% in Fall 1982). The overall college full-time non-return rate has declined from 21% among Fall 1980 entrants to 17% for the Fall 1982 entering cohort.

Part-time persistence has remained relatively stable across all the semesters studied despite a steady increase in part-time enrollment. The one semester non-return rate among part-timers has decreased from 60% to Fall 1978 to 57% in Fall 1982.

Graduation rates were highest among full-time fall entrants after four semesters of attendance. In general, rates of graduation were higher for fall than for spring entrants even after six semesters. The highest graduation rate (24.9%) was among Fall 1979 entrants.

---

[1]Procedures for conducting all of the analyses described in this report have been detailed previously. See Student Enrollment Patterns, 1973-1978; OIR, March 1979.

II. GENERAL FINDINGS: STUDENT ENROLLMENT PATTERNS

A. Full-time Persistence

The one semester return rate for entering fall semester full-timers who returned either full-time or part-time in the following spring has risen gradually over the last five years from a low of 78% in Fall 1978 to a high of 83% in Fall 1982. The return rates for these fall entrants are illustrated in Figure 1. For the second consecutive year, the spring entrants were less likely to return after one semester than the fall entrants. It can be noted that while a low return of 54% occurred among Spring 1981 entrants, the other three spring semester return rates were identical (57%) (see Table 1). It is also encouraging to note that the non-return rate has decreased from 22% for Fall 1978 to 17% for Fall 1982 entrants (see Figure 2).

The one semester full-time to full-time return rate for fall entrants has remained fairly stable over the years studied. A high of 69% occurred among Fall 1979 entrants while 67% of the entering Fall 1981 cohort returned in full-time status the following spring semesters. From Figure 2 it can be seen that in spite of the stability of full-time to full-time return rates, there has been an increase in return rates over the last five years. This can be accounted for by the increasing number of students who are switching from full-time to part-time status instead of dropping out of school. Ten percent of the full-time entering cohort returned to part-time status in the Spring of 1979; this was true for 15% of the comparable cohort in Spring 1983. Among spring semester entrants, the highest rate of one-semester return in full-time status (45%) occurred among Spring 1979 entrants and the lowest (38%) in Spring 1981 (see Table 2).

Spring, 1983 (N = 477)	--	--	--	--	--	--

Note. This table includes all returning students who were originally in the full-time entering cohort. Enrollment figures exclude contract nursing and special groups.

B. Part-time Persistence

After one semester, persistence among part-time fall entrants who returned to either part or full-time status in the spring was highest (44%) for the Fall 1980 and 1981 entering cohorts. Among spring entrants part-time persistence rates were almost identical (32%) for all the years studied (see Table 3). As illustrated in Figure 3, the percentage of students switching to full-time status after one semester has risen from 3% for the Fall 1978 cohort to 5% for the Fall 1982 entrant. The non-return rate among entering part-timers has also decreased from 60% in Fall 1978 to 57% in Fall 1982.

C. Rate of Graduation (Full-time students only)

The Fall 1979 entering full-time cohort had the highest graduation rate (24.9%) after six semesters. Among fall entrants, graduation rates peaked after four semesters of attendance, whereas spring entrants peaked after five semesters. Moreover, spring entrants were less likely to graduate than were fall entrants even after six semesters of attendance (see Table 4).

D. Full-time Student Non-Return Rate after One Semester by Program

Non-return rates for all entering full-time students were examined by program over a span of three years: 1980-81, 1981-82, and 1982-83. The overall college non-return rate has declined from 21% among Fall 1980 entrants and 19% among Fall 1981 entrants to a low of 17% for the Fall 1982 entering cohort. The non-return rates at the program level exhibited the same decreasing pattern. Transfer, Career and Certificate program categories all showed this same trend. The largest decline occurred within the Certificate programs. In 1980-81, out of 40 students 30% did not return whereas only 8% did not return in 1982-83. The non-return rate for Non-degree and Developmental programs rose slightly from 22% in 1980-81 to 24% in 1981-82 and back down again to 23% in 1982-83 (see Table 5).

E. Part-time Student Non-Return Rate After One Semester by Program Type

Non-return rates among part-time entrants were also studied for the years 1980-81 through 1982-83. These rates have dropped substantially in 1982-83 for the Career, Transfer and Certificate programs, while the rate for the Non-Degree and Developmental curricula has increased. College-wide, the rate of part-time non-return has slightly risen over the three years studied (see Table 6).

F. Part-time Students Changing Programs After One Semester

As a final measure of student persistence, patterns of program change after one semester were examined by program type[2] for part-time students. Transfer, Career and Certificate programs showed consistent net gains while Non-Degree programs showed consistent net losses (see Table 7).

[2]Data describing persistence patterns of program-by-program change for full-timers are available from OIR.

*(I) denotes program is inactive.

Note. The category "Non-Returners" includes entrants who did not return in either full or part-time status.

Table 6

Summary of Part-time Student Non-Return Rate After One Semester (Fall to Spring):
1980-81, 1981-82, 1982-83

Program Type	1980-81 Fall Entrants	1980-81 Spring Non-Returnees	1981-82 Fall Entrants	1981-82 Spring Non-Returnees	1982-83[a] Fall Entrants	1982-83[a] Spring Non-Returnees
Transfer	309	159 (51%)	247	145 (59%)	119	31 (26%)
Career	386	189 (49%)	334	171 (51%)	210	75 (36%)
Certificate	58	28 (48%)	91	54 (59%)	40	14 (35%)
Non-Degree & Dev.	1564	910 (58%)	1587	897 (56%)	1942	1197 (62%)
TOTAL	2317	1286 (55%)	2259	1267 (56%)	2311	1317 (57%)

[a]In Fall 1982, only matriculated students were assigned to the appropriate Transfer, Career and Certificate programs. Students that did not go through admissions were assigned to the "non-matriculated" curriculum and are included in the Non-Degree and Developmental program type.

Note. The category "Non-Returnees" includes entrants who did not return in either full or part-time status.

Table 7

Summary of Part-time Students Changing 'To or From' Another Program
After One Semester (Fall to Spring):
